Always back up your world:Before installing a mod it is always a good idea to save your world before you do anything else. This way, if something does not work out and you need to uninstall the mod or require a clean save, you will not lose everything. This is very important and we cannot stress enough how important this step is for most players! Install it correctly:Installing mods is different for each of them because they all have different requirements and rules about what files they will change in Minecraft. For example, some mods will just replace certain files while others will replace a lot more. Make sure to read the mod's description and the developer's website and follow them accordingly. If you trust the mod's description or its developer in general then it is probably safe to install it. If you are unsure at all, it would be a good idea to examine each of your files before installing so that you can see if anything has been altered by this mod.",

Minecraft Servers are great for those who want to play Minecraft with friends, as there is no limit on the number of players allowed and while there are limitations on the maximum number of villagers you can build, you can place practically anything. The worst part is that, there are no anti-cheat systems in Minecraft, so you can just hack all day and night and the server owner will be fine with it. However, this is not recommended because of the consequences you might suffer from when you have a moderator or admin to kick or ban you out. If you want to obtain the same advantages of cheats, but don't want the risks associated with cheats, then try using mods instead. Unfortunately, pro players who get banned for cheating will use ban evading methods which will allow them to bypass bans or avoid detection from server administrators. Many servers have picked up on this and started filtering IPs for known cheats and ban evaders.",
